

DIRECTIONS

Solve each problem. Show your work in the box.
Write your final answer on the answer line (or in the blanks shown).
Use the strategies you learned in Lesson 3.01.04.

Name: _____ Date: _____

1 Plot three numbers

A number line goes from 0 to 1,000 with marks every 100.
Draw the line and plot these three numbers: 250, 600, 950.
Label each point with its number.

DRAW YOUR NUMBER LINE WITH THE THREE POINTS LABELED

(Draw above.) _____

2 Find an unmarked number

A number line goes from 4,000 to 5,000 with marks every 100.
A point is drawn at the 7th tick from 4,000 (count the ticks, not the spaces).
What number does the point show?

SHOW HOW YOU COUNTED

Number at the point: _____

3 Find the midpoint

What is the MIDPOINT between 2,000 and 3,000?
Draw a quick number line to show your thinking.

SHOW YOUR NUMBER LINE

Midpoint: _____

4 Plot a non-round number

A number line goes from 3,400 to 3,500 with marks every 10.
Plot 3,470 on your number line. Then explain how you knew where it went.

DRAW YOUR NUMBER LINE AND PLOT 3,470

(Plot above and explain briefly.) _____

5 Critical thinking — number lines as tools

A number line goes from 0 to 10,000 with marks every 1,000.

Could you EASILY plot 5,250 on this number line?

Why or why not? What's a better number line to use?

WRITE YOUR REASONING

My answer: _____
