

Comparing Fractions Part 1

Independent Practice

Name: _____

Date: _____

INDEPENDENT PRACTICE — SHOW YOUR THINKING

1. Compare $\frac{2}{3}$ and $\frac{3}{4}$. Find a common denominator, re-cut both fractions, and write the comparison using $<$, $>$, or $=$.

2. Compare $\frac{1}{2}$ and $\frac{3}{8}$. Re-cut to a common denominator. Which is bigger?

3. Compare $\frac{3}{4}$ and $\frac{5}{6}$. Show your re-cutting work and write the comparison.

4. Cora says $\frac{2}{5}$ is bigger than $\frac{1}{3}$ because $2 > 1$. Is she right? Re-cut both to check.

Comparing Fractions Part 1 (continued)

5. Felix and Atlas each have a candy bar the same size. Felix ate $\frac{3}{4}$. Atlas ate $\frac{2}{3}$. Who ate more? Show your work.

6. Compare $\frac{1}{4}$ and $\frac{2}{8}$. Are they equal? Re-cut to prove your answer.

7. Reflection: why can you not compare fractions just by looking at the numerators when the denominators are different?
