

Comparing Fractions Part 2

Independent Practice

Name: _____

Date: _____

INDEPENDENT PRACTICE — SHOW YOUR THINKING

1. Compare $\frac{5}{8}$ and $\frac{3}{8}$. Name the shortcut you used and write the comparison.

2. Compare $\frac{2}{5}$ and $\frac{2}{3}$. Name the shortcut you used. Which is bigger?

3. Compare $\frac{5}{6}$ and $\frac{3}{8}$. Use the benchmark (one-half) to decide. Show your reasoning.

4. Atlas says $\frac{4}{7}$ is greater than one-half because 4 is more than half of 7. Is he right? Explain.

Comparing Fractions Part 2 (continued)

5. Sort these fractions as "less than one-half" or "greater than one-half": $\frac{3}{8}$, $\frac{5}{6}$, $\frac{1}{3}$, $\frac{4}{5}$.

6. Compare $\frac{3}{4}$ and $\frac{7}{8}$. Which shortcut works here — same top, same bottom, or benchmark? Explain.

7. Reflection: when does the benchmark shortcut NOT help you compare two fractions?
