Grade 3 Mathematics Unit 11: Measurement
Subtracting from Kilometers — MA.3.M.1.2

Name: _____ Date: _____

INDEPENDENT PRACTICE — SHOW YOUR THINKING

1. $1 \text{ km} - 400 \text{ m} = \underline{\hspace{1cm}} \text{ m}$. Show your steps.

2. $3 \text{ km} - 1,200 \text{ m} = \underline{\hspace{1cm}} \text{ km } \underline{\hspace{1cm}} \text{ m}$.

3. A trail is 2 km long. After hiking 750 m, how much is left? Answer in km and m.

4. Felix runs 5 km. After 3,500 m he stops. How much farther does he need to go?

5. Atlas says " $4 \text{ km} - 600 \text{ m} = 3 \text{ km } 600 \text{ m}$." Is he right? If not, fix it.

6. A bike path is 4 km. Hazel rides 1 km 200 m, then rides 800 m more. How much of the path is left?

7. Reflection: Describe the steps you follow every time you subtract meters from kilometers.
