

DIRECTIONS

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 3.02.07.

Name: _____

Date: _____

1 Bar models — find the missing piece

For each, decide if the missing piece is the WHOLE or a PART. Then find it.

(a) Parts 270 and 360. Whole = _____

(b) Whole 120, one part 70. Other part = _____

(c) Whole 86, one part 38. Other part = _____

SHOW WHICH OPERATION YOU USED AND WHY

(Fill in above.) _____

2 Draw the bar model

Draw a bar model that shows: whole = 540, one part = 350. Then find the other part.

DRAW YOUR BAR MODEL AND SHOW THE MATH

Other part: _____

3 Sum and difference — both answers

Two numbers have a SUM of 640. The greater number is 397.

(a) What is the other number?

(b) What is the DIFFERENCE between the two numbers?

DRAW A BAR MODEL AND FIND BOTH

(a) Other: _____

4 Application — garden beds

The school garden has two beds. Together they hold 175 plants. The big bed has 108.
How many plants are in the small bed?

DRAW A QUICK BAR MODEL

Small bed: _____

5 Critical thinking — why use a bar model?

A bar model takes longer to draw than just doing the math.

Give TWO reasons it is still worth drawing one.

(Think about: tricky words, deciding the operation, checking your answer, ...)

LIST YOUR TWO REASONS

My reasons: _____
