

DIRECTIONS

Solve each problem. Show your work in the box.

Write your final answer on the answer line (or in the blanks shown).

Use the strategies you learned in Lesson 3.02.09.

Name: _____

Date: _____

1 Find the extra fact — then solve

Each problem has ONE fact you don't need. Cross it out, then solve.

(a) A library had 420 books. 185 were borrowed. The library has been open 15 years.

How many books are on the shelves now?

(b) Atlas walked 425 steps to school and 280 steps home. His shoes cost \$25.

How many steps did he walk total?

WRITE THE EXTRA FACT + SHOW YOUR WORK

(a) Books on shelves: _____

2 Spot the mistake

A student solved this:

'Atlas has 60 baseball cards. Felix has 25 FEWER cards than Atlas.

$60 + 25 = 85$. So Felix has 85 cards.'

What is the mistake? What is the correct answer?

WRITE WHAT WENT WRONG AND SHOW THE RIGHT MATH

Correct answer: _____

3 Multi-fact word problem

A bakery sold 156 muffins on Friday and 89 muffins on Saturday.
The bakery has 12 ovens. How many muffins were sold over both days?

CROSS OUT EXTRAS AND SHOW YOUR WORK

Total muffins: _____

4 Application — garden plants

The school garden has 320 plants in all. 175 of them are flowers.
22 students water the plants. How many plants are VEGETABLES?

SHOW YOUR BAR MODEL

Vegetables: _____

5 Critical thinking — the sense check

A 'sense check' means asking: 'Does my answer make sense in the story?'
Why is this powerful — even if you're good at math?
Give one example of a sense check that would catch a real mistake.

WRITE YOUR REASONING AND EXAMPLE

My example: _____
