

DIRECTIONS

Solve each problem. Show your work in the box.
Write your final answer on the answer line.
Use the strategies you learned in Lesson 3.03.01.

Name: _____

Date: _____

1 Stack and add — four problems

Find each sum by stacking. Regroup any column that reaches 10.

(a) $7,625 + 1,835 =$ _____ (b) $3,875 + 3,249 =$ _____

(c) $683 + 8,279 =$ _____ (d) $9,344 + 466 =$ _____

SHOW YOUR STACK FOR THE TRICKIEST ONE

(Fill in above.) _____

2 Different lengths — line them up by ones

Find the sum. Be careful to line the numbers up by ones.

$78 + 6,159 =$ _____

SHOW YOUR STACK AND EVERY REGROUP

Sum: _____

3 Three regroupings in a row

Find $7,777 + 444$. Every place value column needs to regroup.
Show every regroup with a small 1 at the top of the next column.

SHOW YOUR STACK AND ALL THE CARRIES

Sum: _____

4 Missing digits — work backward

Each blank is one digit. Find the digits that make the addition true.

$$\begin{array}{r} 3,4 \blacksquare 7 \\ + \blacksquare, 25 \blacksquare \\ \hline \blacksquare \blacksquare \blacksquare \blacksquare \blacksquare \blacksquare \blacksquare \blacksquare \blacksquare \blacksquare \\ 7,665 \end{array}$$

SHOW HOW YOU WORKED BACKWARD

Missing digits: _____

5 Application — Aki's beads

Aki used 1,458 beads on her wall art and 1,905 beads on her sculpture.
How many beads did Aki use in all?

SHOW YOUR STACK AND REGROUPING

Total beads: _____

6 Critical thinking — what does the regrouped 1 really mean?

When a column adds to 14, you write the 4 and carry a 1 to the next column.
That 1 isn't really 'just one' — what is it actually?
Use place value to explain.

WRITE 2–3 SENTENCES

My explanation: _____
