

DIRECTIONS

Solve each problem. Show your work in the box.

Write your final answer on the answer line.

Use the strategies you learned in Lesson 3.03.03.

Name: _____

Date: _____

1 Cascade through zeros — four problems

Stack, find the cascade path, then subtract.

(a) $4,007 - 335 =$ _____ (b) $8,004 - 3,758 =$ _____

(c) $8,000 - 3,765 =$ _____ (d) $6,002 - 56 =$ _____

SHOW WHAT EACH ZERO BECAME

(Fill in above.) _____

2 Show your cascade in detail

Find $5,017 - 1,996$. Write out the cascade and every column step.

SHOW YOUR STACK AND THE CASCADE PATH

Difference: _____

3 Missing number — work backward

Find the missing piece.

$$6,003 - \underline{\hspace{2cm}} = 4,128$$

SHOW YOUR WORK

Missing number: _____

4 Application — Aki's third project

Aki had 5,057 beads after her last two art projects.
She made a third project and now has 398 beads left.
How many beads did Aki use on her third project?

SHOW YOUR STACK WITH THE CASCADE

Beads used: _____

5 Critical thinking — why zeros become 9s

When the borrow cascades through a zero, that zero becomes a 9 (not a 10).
 What happens to the '10' that the zero gets — where does it go?
 Use $9,005 - 3,397$ as your example.

WRITE 2–3 SENTENCES

My explanation: _____
