

DIRECTIONS

Solve each problem. Show your work in the box.
Write your final answer on the answer line.
Use the strategies you learned in Lesson 3.03.04.

Name: _____

Date: _____

1 Estimate by rounding to the nearest hundred

Round each number to the nearest hundred, then add or subtract.

- (a) $838 - 72 \approx$ _____ (b) $584 + 47 \approx$ _____
(c) $972 - 356 \approx$ _____ (d) $784 + 562 \approx$ _____

SHOW YOUR ROUNDING FOR AT LEAST TWO

(Fill in above.) _____

2 Estimate two ways — which is closer?

For $642 - 87$, estimate two ways:

- (a) Round 642 to nearest HUNDRED, 87 to nearest TEN. Estimate = _____
(b) Round BOTH to nearest TEN. Estimate = _____

Actual answer: 555. Which estimate is closer?

SHOW BOTH ESTIMATES AND THE COMPARISON

Closer estimate: _____

3 Closer to 200 or 300?

Is the value of $726 - 432$ closer to 200 or closer to 300?
Use rounding to decide WITHOUT doing the exact subtraction.

SHOW YOUR ROUNDING AND ANSWER

Closer to: _____

4 Application — Carlos and Grace's coins

Carlos has 498 foreign coins and 423 domestic coins.
Grace has 968 foreign coins and 75 domestic coins.
About how many coins does each have? (Round to a friendly hundred.)

SHOW YOUR ROUNDING

Carlos $\approx$ ____ · Grace $\approx$ ____

5 Critical thinking — when smaller rounding helps

Rounding to a SMALLER place (tens) gives a closer estimate than rounding to a BIGGER place (hundreds). Why is that? Use one of the problems above as your example.

WRITE YOUR REASONING

My explanation: _____
