

DIRECTIONS

Solve each problem. Show your work in the box.
Write your final answer on the answer line.
Use the strategies you learned in Lesson 3.03.05.

Name: _____

Date: _____

1 Estimate by rounding to the nearest hundred

Round each number to the nearest hundred, then add or subtract.

- (a) $5,986 + 76 \approx$ _____ (b) $3,008 - 754 \approx$ _____
(c) $9,721 - 4,907 \approx$ _____ (d) $4,589 + 5,125 \approx$ _____

SHOW YOUR ROUNDING FOR THE TRICKIEST ONE

(Fill in above.) _____

2 Estimate two ways

For $4,223 + 758$, estimate two ways:

- (a) Round 4,223 to nearest THOUSAND, 758 to nearest HUNDRED. Estimate = _____
(b) Round BOTH to nearest HUNDRED. Estimate = _____

Actual answer: 4,981. Which estimate is closer?

SHOW BOTH ESTIMATES AND YOUR COMPARISON

Closer estimate: _____

3 Closer to 7,000 or 8,000?

Is the value of $4,299 + 3,467$ closer to 7,000 or to 8,000? Show your rounding.

SHOW YOUR WORK — TRY BOTH THOUSANDS AND HUNDREDS ROUNDING

Closer to: _____

4 Application — computer sale

Computer A costs \$2,413, on sale for \$450 less.

Computer B costs \$3,183, on sale for \$699 less.

About how much will each cost after the sale? Which is cheaper?

SHOW EACH ESTIMATE

Cheaper: _____

5 Critical thinking — estimation as a check

A student computed $4,223 + 758$ by hand and got 12,981.

Without doing the actual sum yourself, can you tell their answer is wrong?

How does estimation help you catch this?

SHOW THE ESTIMATE AND EXPLAIN

My explanation: _____
