

DIRECTIONS

Solve each problem. Show your work in the box.
Write your final answer on the answer line.
Use the strategies you learned in Lesson 3.03.06.

Name: _____

Date: _____

1 The sofa sets (two steps)

A 4-seat sofa set costs \$1,309. The 3-seat sofa set costs \$810 less.
How much do both sofa sets cost altogether?

Step 1: _____ - _____ = _____ Step 2: _____ + _____ = _____

SHOW BOTH STEPS CLEARLY

Total: _____

2 The cupcake sale

A school sold 2,418 cupcakes in the fall. They sold 657 MORE in the spring than in the fall.
How many cupcakes did the school sell IN ALL?

SHOW STEP 1 (SPRING) + STEP 2 (TOTAL)

Total cupcakes: _____

3 The mall lights

A mall used 5,000 lights total. 1,847 were red, the rest were purple.
The mall used 1,256 blue lights elsewhere.
How many FEWER blue lights than purple lights did the mall use?

FIND PURPLE FIRST (CASCADE!), THEN SUBTRACT

Fewer blue: _____

4 Estimate-check on Problem 1

Take your final answer from Problem 1 above.
Estimate the same problem by rounding each number to the nearest hundred.
Is your exact answer within 50 of the estimate? Show your work.

SHOW YOUR ROUNDING

Estimate $\approx$ ____ · Within 50? _____

5 Critical thinking — name the hidden step

For each story below, write down the HIDDEN MIDDLE QUESTION (what you'd need to find FIRST).
You DON'T have to solve them — just name the hidden step.

(a) Hazel has 80 stickers. She gave away 18 and lost 7. How many left?

(b) A store had 6,200 books. 1,847 were sold and 425 were donated. How many remain?

WRITE THE HIDDEN STEP FOR EACH

(a) Hidden: _____
