

Division with Remainders

Name: _____

Date: _____

INDEPENDENT PRACTICE · SHOW YOUR THINKING

1

Find: $14 \div 4 = \underline{\quad} R \underline{\quad}$ · $17 \div 5 = \underline{\quad} R \underline{\quad}$ · $23 \div 3 = \underline{\quad} R \underline{\quad}$

2

Hazel has 23 sushi pieces. She puts 3 on each plate. How many full plates? How many leftover?

3

Felix has 38 pennies. He trades them for nickels (5 pennies = 1 nickel). How many nickels does he get? How many pennies left?

4

17 children get into cars that hold 5 each. How many cars are needed?

5

Explain the remainder. What does the R mean in a division answer? Use a picture.

6

Write a story problem that ends with the answer 4 R 2.
