

Odd and Even Numbers

Name: _____

Date: _____

INDEPENDENT PRACTICE · SHOW YOUR THINKING

1

Circle the even numbers: 11, 14, 15, 16, 17, 20.

2

Circle the odd numbers: 17, 16, 15, 14, 11.

3

Find each sum and say even or odd: $6 + 8 = \underline{\quad} (\underline{\quad})$ $5 + 7 = \underline{\quad} (\underline{\quad})$ $6 + 5 = \underline{\quad} (\underline{\quad})$

4

Divide 9 counters into 2 equal groups. Can you do it without leftovers? Is 9 even or odd? Draw it.

5

Without computing, predict whether each sum is even or odd: (a) $12 + 9$ (b) $14 + 6$ (c) $7 + 7$. Then check.

6

Explain: why does odd + odd always equal even? Use a paired-up picture.
