

Dividing Tens and Hundreds

Name: _____

Date: _____

INDEPENDENT PRACTICE SHOW YOUR THINKING

1

Find each: $6 \div 3 = \underline{\quad}$, $60 \div 3 = \underline{\quad}$, $600 \div 3 = \underline{\quad}$. What stays the same? What changes?

2

Find: $8 \div 2 = \underline{\quad}$, $80 \div 2 = \underline{\quad}$, $800 \div 2 = \underline{\quad}$

3

Find: $9 \div 3 = \underline{\quad}$, $90 \div 3 = \underline{\quad}$, $900 \div 3 = \underline{\quad}$

4

800 paper clips shared among 4 bins. How many in each bin? Show with discs.

5

Felix says $50 \div 5 = 1$. Is Felix right? If not, fix it and explain.

Dividing Tens and Hundreds (continued)

6

Reflection: how does knowing $6 \div 3$ help you find $600 \div 3$?
