

Fractions of a Whole

Name: _____

Date: _____

INDEPENDENT PRACTICE SHOW YOUR THINKING**1**

A strip is cut into 5 equal parts and 2 are shaded. Write the fraction shaded (stacked: top over bottom).

2

Sketch a rectangle cut into 8 equal parts. Shade 3 of them. Write the fraction shaded.

3

A pizza is cut into 6 equal slices. Atlas eats 4. Write the fraction Atlas ate. Then write the fraction left over.

4

Hazel says "the bottom number tells how many parts I shaded." Is Hazel right? Fix the mistake.

Fractions of a Whole (continued)

5

Draw a strip showing three-fourths. Label the numerator and the denominator.

6

Felix cuts a cake into 4 pieces, but they are NOT all the same size. Can he call one piece "one-fourth"? Explain.

7

Reflection: why does a fraction need equal parts to make sense?
