

Comparing Fractions with Like Numerators

Name: _____

Date: _____

INDEPENDENT PRACTICE SHOW YOUR THINKING

1

Compare: which is bigger, one-half or one-fourth? Sketch both strips. Write the comparison.

2

Compare: three-fourths and three-eighths. Which is bigger? Write the comparison.

3

Compare: two-thirds and two-sixths. Sketch both. Write the comparison.

4

Hazel has one-fifth of a pizza. Cora has one-third of the same-size pizza. Who has more, and why?

Comparing Fractions with Like Numerators (continued)

5

Three fractions: two-fourths, two-eighths, two-twelfths. Put them in order from smallest to largest.

6

Felix says "the fraction with the bigger denominator is always bigger." Is Felix right? Fix the mistake.

7

Reflection: why does a smaller denominator make a bigger piece?
