Grade 3 Mathematics Unit 11: Measurement
Unit 11 Summative Assessment

Name: _____ Date: _____

Measurement — Show all your thinking. Use pictures, numbers, or words.

1. Convert 6 m to centimeters.

2. $3\text{ m} - 85\text{ cm} = \underline{\hspace{1cm}}\text{ m } \underline{\hspace{1cm}}\text{ cm}$. Show your work.

3. Convert 4 km to meters.

4. $5\text{ km} - 2,300\text{ m} = \underline{\hspace{1cm}}\text{ km } \underline{\hspace{1cm}}\text{ m}$.

5. Convert 2 L to milliliters.

6. $3\text{ L} - 1,400\text{ mL} = \underline{\hspace{1cm}}\text{ L } \underline{\hspace{1cm}}\text{ mL}$.

7. A bag of apples weighs 1 kg 200 g. A bag of oranges weighs 950 g. Which is heavier? By how many grams?

8. Cora has a 3 m ribbon. She uses 1 m 45 cm for a project. How much ribbon is left?

9. Explain the pattern you see in these conversions: 1 m = 100 cm, 1 km = 1,000 m, 1 L = 1,000 mL, 1 kg = 1,000 g. Why do you think measurement works this way?
